ITT

ENGINEERED FOR LIFE

More solutions from us equals more success for you.

At ITT Torque Systems, we have always believed in giving you more choices. After all, your application is unique, so the servomotor you choose for it should be unique too. While the competition stacks their shelves with motors and hardware, we pack ours with engineered solutions. The truth is, our shelf contains just about any type of solution you could require, from simple integration components such as brakes, encoders and tachometers, to elaborate breakthrough designs.

Our typical standard integration options include:

- | | |
|---|---|
| A) Custom Connectors
Connector Locations
Cabling | D) Hall Sensors
Standard and Custom
Encoders
Resolvers
Tachometers
Brakes |
| B) Multiple Standard Winding
Configurations
Matched Windings
Thermostats | E) Standard Flange
Mounting
NEMA Mounting
IEC Mounting
Multiple Gearhead
Options |
| C) Standard & Custom
Shaft Configurations | |

We engineered the MDM-5000 high-energy brushless servomotor with advanced design features to deliver the industry's highest available torque density in a compact and versatile platform. MDM-5000 servomotors are available in models that produce stall torque up to 35 to 40% higher than conventional designs. The high output is made possible by cut-core, segmented stator lamination technology contained in a high efficiency heat transfer capsule, high slot-fill windings, and a high flux neodymium magnet array.

Standard models are available in either NEMA or IEC mounting configurations with assemble to order availability as standard. Four sizes – 60mm, 85mm, 110mm and 140mm are available with a continuous stall torque range .5Nm (4.5 lb-in.) to 27.5Nm (243 lb-in.).

ITT Torque Systems can quickly customize the MDM-5000 to fit the most challenging applications and requirements. A wide range of windings is available for fine-tuning to specific power supply specifications. We also offer a broad array of brake and gearbox options and custom termination, connectorization, and cabling configurations to facilitate your assembly requirements. Off-the-shelf feedback options include encoders stocked with multiple line counts, hall sensors, and resolvers.

sales@electromate.com

Our typical custom engineered options include:

Extended Ambient Temperature Ratings
Custom Winding Configurations
Special Electromagnetic Design Platforms
Specialized Military Coatings
Corrosion Resistant Materials
Food Grade Materials
Custom Bearings
Witness Testing
IP 67 Sealing

High Energy Brushless Servomotor Platforms

Key ■ Continuous Duty ■ Intermittent Duty

Standard Design Features:

High Energy Neodymium Magnets
 CE/UL/CUL Compliant
 Multiple Winding Availability
 IP 67 Construction
 Clean Operating, Low Maintenance Brushless Design

Rigid Application Development Process:

Application Review
 Motion Profile Analysis
 Magnetic FEA 3D Modeling & Computer Simulation
 Prototype Design
 Performance Verification

The MDM-5000 internal component design integrates superbly into customer equipment where size and weight are important considerations. The MDM-5000's superior torque density provides a compact design that easily fits into your equipment, reducing overall size and maximizing rate and position accuracy. Molded in place stator construction maximizes design in flexibility - either molded into typical cylindrical housings or into unique equipment housings that demand specific dimensional requirements. Easier design-in means you don't have to compromise your design to fit our motors.

Notes:

- Additions including brakes, resolvers, rear shaft extensions, and seals will increase overall length
- Shaft extension includes motor face pilot
- Connectors, connector housings, and mounting flanges may increase overall envelope dimensions
- Nema and IEC mounting standards available
- Motor dimensions subject to change
